

SHIVAM SHRIVASTAV

DATA SCIENCE & DATA ANALYTICS

8700067486 | Najafgarh, New Delhi | shivamshrivastav008@gmail.com | [linkedin.com/in/shivam-shrivastav-4ba086255/](https://www.linkedin.com/in/shivam-shrivastav-4ba086255/) | github.com/shrivastav-05

PROFESSIONAL SUMMARY

Aspiring Data Science and Data Analytics professional with hands-on experience in Python, SQL, Pandas, NumPy, Scikit-learn, Excel, and Power BI. Skilled in data analysis, data cleaning, exploratory data analysis, data visualization, feature engineering, and machine learning. Developed end-to-end projects in customer profitability, e-commerce analytics, sales analysis, and recommendation systems. Seeking an entry-level Data Analyst or Data Science opportunity to apply technical and analytical skills to real-world business problems.

TECHNICAL SKILLS

Programming & Database: Python, SQL, MySQL

Data Analysis & Visualization: Pandas, NumPy, Excel, Power BI, Matplotlib, Seaborn, EDA

Machine Learning: Scikit-learn, Classification, Regression, Feature Engineering, Model Evaluation, Cross-Validation

Tools & Frameworks: Jupyter Notebook, GitHub, Flask, Streamlit

PROJECTS

1. ValueSphere AI — Customer Lifetime Value & Profitability Prediction

Python | Pandas | Scikit-learn | Flask

 - Developed an end-to-end ML system to analyze customer behavior and predict future profitability.
 - Performed data preprocessing, EDA, and feature engineering to build a robust model.
 - Generated customer-level insights and business recommendations.
 - Built a Flask web application for interactive customer profitability prediction.
2. ReturnSense AI — E-Commerce Return Prediction System

Python | Pandas | Scikit-learn | Flask

 - Developed a machine learning classification model to predict e-commerce product returns.
 - Performed data preprocessing, feature engineering, and categorical encoding.
 - Built a reusable ML pipeline and evaluated multiple models.
 - Developed a Flask web application to predict return probability with actionable insights.
3. SalesPulse BI — Sales Performance & Profitability Analysis

Python | Pandas | NumPy | Flask

 - Analyzed large-scale sales transaction data to identify revenue, profit, and discount trends.
 - Performed data cleaning and exploratory data analysis.
 - Generated insights across product categories, regions, and payment methods.
 - Provided data-driven recommendations to improve sales and profitability.
4. ReelMind AI — Movie Recommendation System

Python | Pandas | Scikit-learn | Streamlit

 - Developed a content-based movie recommendation system using movie metadata.
 - Performed data preprocessing and feature engineering for movie representation.
 - Implemented similarity-based recommendations using Scikit-learn.
 - Built an interactive Streamlit application with movie posters and search functionality.

EDUCATION

Bachelor of Computer Applications (BCA)	Indira Gandhi National Open University, Delhi	December 2026
Class XII	Govt. Boys Sr. Sec. School No. 1, Najafgarh	2023 82%
Class X	Bholi Ram Public School, Najafgarh, New Delhi	2021 80%

TRAINING & CERTIFICATIONS

- Data Science Course** — BIIT Classes
- Microsoft Excel** — Simplilearn
- Microsoft Power BI** — Simplilearn

LANGUAGES
